

JAL Cargo Fuel Surcharge for the Month of January 2013

TOKYO December 14, 2012: Japan Airlines (JAL) has applied to the Japanese Ministry of Land, Infrastructure, Transport and Tourism (MLIT) to revise down its international cargo fuel surcharge for flights departing from Japan from January 2013.

Since April 1, 2009, JAL started adjusting its cargo fuel surcharge levels on a monthly basis by using the one-month average fuel price of Singapore kerosene of the month before last. As the average fuel price of Singapore kerosene for the month of November in 2012 was US\$125.07 per barrel, the benchmark fuel price used for calculation of the fuel surcharge level will be within the range of US\$125.00 to US\$129.99 per barrel (refer to table below).

The international cargo fuel surcharge will therefore be 127 yen per kg on long-haul international routes, 102 yen per kg on medium-haul international routes, and 80 yen on short-haul routes.
