

## Revision to JAL Group Route and Flight Frequency Plan for Second Half FY2009 and Domestic Routes for First Half FY2010

**Tokyo, November 5, 2009:** The JAL Group announced today, further changes to its overall route and flight frequency plan for the second half of FY2009, and plans for a portion of its domestic passenger operations for the first half of FY2010.

With a focus on improving profitability and reducing costs, a bold review of underperforming routes was conducted, as slated in the Progress Report of its Medium Term Corporate Plan issued June 19, 2009. As a result, the JAL Group will discontinue operations on 8 international and 8 domestic routes, as well as 1 cargo route. Flight frequency on 2 international routes will also be reduced, and the total effect of these changes is a trim down of 61, 91 and 3 weekly return flights in the international, domestic and cargo networks respectively.

In summary, within the three fiscal half-years of April 2009 to September 2010, reductions and suspensions were decided to be carried out on a total of 13 international, 15 domestic and 2 cargo routes, along with the closure of 4 overseas and 2 domestic offices.

Aircraft used on a total of 5 routes will be also be downsized as JAL progressively renews its fleet with more fuel-efficient aircraft.
