

JAL Selected for Dow Jones Best-in-Class Asia Pacific Index for the Fourth Consecutive Year

Tokyo, JAPAN – Japan Airlines Co., Ltd. (JAL) has been selected for the Dow Jones Best-in-Class Asia Pacific Index for the fourth consecutive year. This index, part of the Dow Jones Best-in-Class Indices (DJBIC Indices), is a leading Environmental, Social, and Governance (ESG) investment benchmark consisting of companies from the Asia-Pacific region.

In addition to the DJBIC Asia Pacific Index, JAL has been included in various other leading ESG investment indices such as the FTSE Blossom Japan Index and the FTSE Blossom Japan Sector Relative Index. *1 DJBIC Indices are renowned ESG investment benchmarks that comprehensively analyze and evaluate the corporate activities of over 13,000 leading global companies. They select companies excelling in sustainability across governance, economic, environmental, and social aspects. This recognition is highly significant for investors prioritizing corporate social responsibility and sustainability.

In this year's assessment, JAL received the highest rating within the airline industry in areas such as multi-stakeholder engagement for decarbonization, packaging material management including single-use plastic reduction, human capital management, and occupational health & safety. The company also earned high ratings for disclosures based on the Task Force on Climate-related Financial Disclosures (TCFD)*2 and the Task Force on Nature-related Financial Disclosures (TNFD)*3 recommendations, as well as efforts in human rights and privacy protection. *4

JAL positions the creation of social value as the core and growth engine of its business. The company works to spread joyful connections that transcend regions, countries, and generations to realize better lives and a better society. United as one company, it pursues a long-term balance of sustainability among the environment, society, and the company.

Examples of Sustainability Initiatives for FY2025

The supply chain for the mass production and distribution of domestic SAF is now fully operational

In collaboration with stakeholders, domestically produced SAF made from used cooking oil and certified under ISCC CORSIA was supplied for the first time to passenger flights in Japan.

Slippers made from 100% recycled materials (top) and a shoehorn made from 100% plant-based materials (bottom)

Efforts are being made to reduce environmental impact through the effective use of limited resources by reducing the use of new petroleum-based single-use plastics.

A team of JAL Sunlight employees won the barista competition for people with disabilities

"SKY CAFE Kilatto" offers coffee service to employees. JAL is committed to fostering an inclusive workplace where employees with disabilities can thrive.
