

## *Japan Airline Becomes First Airline in Japan to Register as TNFD Adopter*

**Tokyo, JAPAN** - Japan Airlines Co., Ltd. (President and Group CEO: Yuji Akasaka) has achieved an important milestone by becoming the first airline in Japan to register as the TNFD Adopter<sup>(\*)2</sup>, an adopter of the Taskforce on Nature-related Financial Disclosures (TNFD)<sup>(\*)1</sup>

In March 2023, JAL participated in the TNFD Forum and in August 2023, became the first airline in Japan to [disclose information based on the TNFD recommendations in advance](#). Moving forward, based on the final recommendations released in September of this year, JAL is committed to further enhancing its disclosure practices and accelerating efforts to realize Nature Positive<sup>(\*)3</sup> together with all other early adopters.

Joint Release: September 19, 2023 [Ukenmura in Amami Oshima, Sophia University, ITOCHU Corporation, and JAL conclude industry-academia-government collaboration agreement on environmental conservation and regional development](#) (Japanese only)

The JAL Group has been actively promoting various initiatives to ensure the conservation of species through the prevention of illegal wildlife trade, the maintenance of ecosystems through plant quarantine, and the preservation of natural resources at World Natural Heritage sites. These efforts reflect JAL's strong dedication to passing on a prosperous Earth to future generations. Looking ahead, JAL will further enhance its existing efforts to achieve Nature Positive and actively work towards building a society where nature and people coexist harmoniously through our business activities.

\*1 International initiative that provides a framework for assessing and disclosing information on impacts on the natural environment and biodiversity.

\*2 Companies and organizations that have decided to make disclosures based on the final recommendations by fiscal year 2025 or 2026. The registered companies will be announced at the World Economic Forum Annual Meeting (Davos Meeting) in January 2024.

\*3 To Stop the loss of biodiversity and put the natural environment on a recovery track.
